***Response to Amendment***

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-24 is the inclusion of the limitation of an air flow generating unit formed with a suction hole, when positioned at the nozzle orifice, the air flow generating unit generating a spiraling current by sucking air into the suction hole, and ink also sucking in with the spiraling current. It is this limitation found in each of the claims, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

**Note:**

The subject matter in the reason for allowance is an air flow generating unit with a suction hole, when positioned at the nozzle orifice, the air flow generating unit generating a spiraling current by sucking air into the suction hole. The underlined portion is the "Functional limitations" of the subject matter. A functional limitations is an attempt to define something by what it does, rather than by what it is. In the instant application, the functional limitation set definite boundaries on the patent protection sought, refer to MPEP 2173.05(g). Therefore, claims 1-24 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
